**Preface Illness and Time – A Natural Philosophy of Medicine ..... 9**
*Prof. Dr. med. Jürgen Hescheler*

**1. Scientific Foundations of Medicine – Remarks on the Concepts of Entropy and Order in Physics, Biology and Medicine ..... 15**
1.1 On the Concept of Entropy in the Scope of Physics ..... 15
1.2 Importance of Entropy in Living Systems ..... 18
1.3 Entropy and Self-organization ..... 19
1.4 Significance of the Entropy Concept for Medicine ..... 22

**2. Systems of Life Exist at the Edge of Chaos ..... 27**
2.1 Attractors at the Center of Health and Disease ..... 31
2.2 Attractors and Internal Clocks in the Organism ..... 34
2.3 From Mathematical Models to a Deeper Understanding of the Dynamics of Diseases ..... 40
2.4 Complex Regulatory Systems in the Organism ..... 41

**3. The Concept of Information as a Central Metaphor in Physics, Biology and Medicine ..... 49**
3.1 Introduction and General Remarks ..... 49
3.2 Natural Philosophical Remarks on the Structure of the Concept of Information ..... 54
3.3 On the Importance of the Complementarity Principle in Biology and Medicine ..... 66
3.4 Information and the Maxwellian Demon in Medicine ..... 68
3.5 From the Molecule to the Informational Networks of the Cell ..... 70
3.6 Intracellular Communication Pathways ..... 72
3.7 Information Transfer via Membrane Receptor Proteins ..... 73
3.8 Intracellular Signaling Cascades ..... 74

**4. Integrity-Maintaining Systems: The Emergence of Disease from an Informational Perspective ..... 75**
4.1 Introduction: Order as a Fundamental Principle of Life ..... 75
4.2 Neoplasia and Genes ..... 76

4.3 Clonal Evolution Model ..... 78
4.4 Model of the Tumor Stem Cell ..... 78
4.5 Control and Regulatory Mechanisms Used by Oncogenes and Tumor Suppressor Genes ..... 80
4.6 Tumor Development and Growth Occur in Sequential Steps ..... 85
4.7 Chaotic Pattern Formation in the Evolution of a Tumor ..... 87
4.8 Cancer is Primarily a Systemic Disease ..... 88
4.9 Selected Malignant Tumors and their Molecular Basis ..... 91
4.10 On the Role of Environmental Factors in the Development of Neoplasms ..... 93
4.11 Remarks on the Molecular Course of Chemical Carcinogenesis ..... 94
4.12 Invasion and Metastasis ..... 95
4.13 Tumors and Chaotic Dynamics, Turbulence and Non-Equilibrium States ..... 96
4.14 Fractal Surface Geometry of Benign and Malignant Neoplasms ..... 101

**5. Inflammatory Systems as an Informational Autoregulatory Network .. 107**
5.1 General Description ..... 107
5.2 Autoregulatory Networks of Cells and Mediators ..... 111
5.3 Infection as Pathogen-Induced Inflammation ..... 117

**6. The Immune System Itself as an Organizational Model ..... 119**
6.1 Introductory Remarks on Structure and Function ..... 119
6.2 Receptors as Software for Molecular Recognition in Immunology ..... 123
6.3 Boundless Recognition Capability of Antibodies ..... 125
6.4 Remarks on the Antibody Family ..... 127
6.5 Immune System as Cellular and Molecular Memory ..... 128
6.6 T Cells and Signal Transduction ..... 129
6.7 T Cell Receptors and the Complex in the Simple ..... 131
6.8 The Complement System as a Multi-cascade System within the Immune System ..... 132
6.9 Systems Theoretical Aspects of the Complement System ..... 136
6.10 Immune System out of Control ..... 138
6.11 Summary View of the Immune System ..... 143

**7. Collective Catalytic Networks in Selected Disease Patterns ..... 145**
7.1 Acute Appendicitis ..... 145
7.2 Acute Peritonitis ..... 147

**8. (No) Significance of Quantum Physics for the Medicine of the Future? 153**

**9. Disease in the Context of the Living ..... 173**
9.1 Life as Misunderstood Otherness ..... 173
9.2 Limits of Reductionism in Biology and Medicine ..... 179
9.3 The Equally Reductionist and Holistic Nature of Medicine ..... 186
9.4 On Emergence and Teleonomy in Biology and Medicine ..... 189
9.5 Disease and Emergence ..... 195

**10. The World as Information: Attempting an Objective Semantics of Disease ..... 199**
10.1 The Layered Structure of the World ..... 199
10.2 About Errors to Development ..... 200
10.3 Diseases between Linearity and Non-Linearity ..... 206
10.4 From the Concept of Information to a Semantics of Illness ..... 207
10.5 On the Semantics of Disease in an Evolutionary Context ..... 210
10.6 Disease and Medicine in the Center of the Cultural History of Mankind ..... 219

**11. Disease and Time ..... 223**
11.1 Fractal Time Structures of Illness ..... 223
11.2 Disease as a Form of Possible Knowledge ..... 227
11.3 Lifetime ..... 229
11.4 Medicine and Death ..... 234

**12. Disease: From Information to Language ..... 237**
12.1 Disease and Semantic Information ..... 237
12.2 Disease as Symbol and Language ..... 241
12.3 The Handkerchief ..... 247

**13. Medicine‘s View of the World and the Human Being in the 21st Century ..... 249**
13.1 Loss of Certainty in the Scientific Worldview ..... 249
13.2 Natural Science and Modern Medicine ..... 253
13.3 Changing Values and Nihilism in Modernity ..... 254
13.4 Newly Emerging Scientific Worldview and its Impact on Medicine ..... 259
13.5 Modern Medicine in Search of Itself ..... 267
13.6 Spirituality and the Medicine of the 21st Century? ..... 271

**Literature ..... 279**
